SUBJECT INDEX

Absorption spectra
Infrared absorption spectra of some lanthanide acetylacetonate complexes 559

Acetylacetonate complexes
Study of the Infrared absorption spectra of some lanthanide acetylacetonate complexes 559

Alpha-convexity
On the radius of α-convexity of certain classes of starlike functions 367

Ammonium thiocyanate
Volumetric determination of copper by precipitation with ammonium thiocyanate 55

Amperometry
Polarography of potassium ethylxanthate, a titrant in amperometry 514

Anodic reaction
Polarography of potassium ethylxanthate, a titrant in amperometry 514

Aromatic aldehydes
Formation of heterocyclic rings containing nitrogen : Part XXVI — Condensation of pyridine 2, 3-diamine with aromatic aldehydes 204

Arsenazo, Spadns
Potentiometric determination of thermodynamic parameters for the complex formation of Arsenazo I and Spadns with ytterium (III), zirconium (IV) and cerium (IV) 531

Bending stress
Thermal deflection of an elastic circular plate of variable thickness 1

Benzodipyrandiones
Synthesis of benzodipyrandiones 524

Boundary layer flow
The effect of suction on boundary layer for rotating flows with or without magnetic field 332

Boundary value problems
A finite transform involving generalized prolate spheroidal wave functions and its applications 41

Boundary value problem
Generalized prolate spheroidal wave functions 104

Cadmium determination
Determination of cadmium by precipitation of cadmium molybdate from homogeneous solution 403

Cadmium extraction
Synergism in the extraction of cadmium 75

C–energy
An exact solution of a scalar-tensor theory of gravitation 90

Circular disc
On the conformal mapping of a circular disc with a curvilinear polygonal hole 406

Circular pipe
Heat transfer by magneto-hydrodynamic laminar flow in circular pipe 251
On the flow of a dusty viscous liquid through a circular pipe 299

Coastline stability
Stability of the coastline from Manakkodam to Thottappally along the Kerala coast 191

Coordinated chlorides
Substitution of coordinated chlorides in cis–α and cis–β dichloro (triethlyene tetramine) cobalt (III) chloride $[Co(trien)Cl_2]Cl$ by thiocyanate in aqueous medium 319

Convection flow
Effect of sudden suction on the hydromagnetic natural convection from a vertical plate 280

Convective flow
Fully developed flow and heat transfer of water at 4° C confined between two parallel vertical walls with linearly varying wall temperatures 167

Couette flow
Generalized couette flow with suction and injection 243

Crystallisation
Albitisation at serpentinite-granite contact at Tagadur, Karnataka, India 58

Cup cores
Multiple sintering of MnZn ferrites in controlled atmosphere 131

Cylindrical waves
An exact solution of a scalar-tensor theory of gravitation 90

Cyclonic disturbances
Periodicities in the series of cyclonic disturbances over India 429

Cyanoethylation
Cyanoethylation of some dimethyl- and trimethylphenols 115

DeFord-Hume method
A polarorgraphic study of methionine complexes of cadmium and indium 454

Diffraction theory
Triple and quadruple integral equations occurring in diffraction theory 179

Dimethyl, trimethylphenols
Cyanoethylation of some dimethyl- and trimethylphenols 115

Dipolar mixture
Study of microwave absorption and molecular structure of some substituted naphthalene sulphonic acids and their dipolar mixture 486

Discrete inequalities
On discrete inequalities related to Gronwall's inequality 26

Duel integral equations
A remark on the paper of Dwivedi 186

Dusty liquid
On the flow of a dusty viscous liquid through a circular pipe 299

Ekman-Hartmann layers
Combined effects of free and forced convection on magneto-hydrodynamic flow in a rotating channel 383

Elastic cylinder
On the mechanical impedances for torsional wave propagation in a solid elastic cylinder 307

Elastic foundation
Thermally induced vibrations of orthotropic rectangular plate resting on elastic foundation 125

Elastico-viscous flow
Elastico-viscous flow engendered due to an impulsively started porous plane wall 272

Electron content
Ionospheric total electron content and slab-thickness at low latitudes in Indian zone 415

Electronic excitation
The vibrational and electronic spectra of 5-methyl pyrimidine and 4-methyl pyrimidine 476

Equatorial anomaly
Ionospheric total electron content and slab-thickness at low latitudes in Indian zone 415

Exponential populations
Pooling two censored samples from exponential populations 263

Faraday rotation
Ionospheric total electron content and slab-thickness at low latitudes in Indian zone 415

Finite amplitude
Free and forced finite amplitude oscillation of a spherical shell of radially isotropic elastic material 153

Finite transform
A finite transform involving generalized prolate spheroidal wave functions and its applications 41

F region
Equatorial range spread *F* and high multiple echoes from the *F* region 230

Finite transform
Generalized prolate spheroidal wave functions 104

Flow between discs
Radial flow of a viscous, incompressible, electrically conducting fluid between two stationary, porous discs in the presence of transverse magnetic field 19

Fluid dynamics
Fully developed flow and heat transfer of water at 4° C confined between two parallel vertical walls with linearly varying wall temperatures 167

Fox analysis
A remark on the paper of Dwivedi 186

Fredholm theory
Triple and quadruple integral equations occurring in diffraction theory 179

General relativity
On the geometry of null congruences in general relativity 546

Germanium-cadmium sulphide
Vanadometric estimation of germanium 64

Germanium
Vanadometric estimation of germanium 64

Granitic rocks
Sphene bearing gneisses of Madhugiri area, Karnataka State, India 210

Gronwall's inequalities
On discrete inequalities related to Gronwall's inequality 26

Groundwater
Soil moisture movement and groundwater recharge by tritium tracer tagging technique 462

H-function
The *H*-function and temperature in a non-homogeneous bar 99

Hartmann number
Effect of sudden suction on the hydromagnetic natural convection from a vertical plate 280

Heat transfer
Fully developed flow and heat transfer of water at 4° C confined between two parallel vertical walls with linearly varying wall temperatures 167

Heterocyclic rings
Formation of heterocyclic rings containing nitrogen : Part XXVI — Condensation of pyridine 2, 3-diamine with aromatic aldehydes 204

Hexachloropropene reaction
Reaction of hexachloropropene with dihydroxy aryl aldehydes, ketones and acids 236

Histidine
Interaction of potassium hexacyanoferrate (II) with histidine 199

Homogeneous solution
Determination of cadmium by precipitation of cadmium molybdate from homogeneous solution 403

Huygens property
Jacobi temperature 498

Hypergeometric equation
Thermal deflection of an elastic circular plate of variable thickness 1

Hypersurfaces
Hypersurfaces of a nearly Sasakian manifold with quasi-normal (f, g, u, v, λ)–structure 537

Indirect polarography
Indirect polarographic determination of stability constants : Zinc complexes with glycollic acid 472

Internal stratum
Magneto-elastic transverse surface waves in an internal stratum 442

Ionosphere
Equatorial range spread *F* and high multiple echoes from the *F* region 230

Isotropic elastic material
Free and forced finite amplitude oscillation of a spherical shell of radially isotropic elastic material 153

Isotropy
Radial deformation of a nonhomogeneous spherically isotropic elastic sphere with a concentric spherical inclusion 338

Jacobi polynomials
The *H*-function and temperature in a non-homogenous bar 99

Laminar flow
Heat transfer by magneto-hydrodynamic laminar flow in circular pipe 251

Loaded synovial joints
Lubrication of porous solids in reference to human joints 144

Low-current electrolysis
Electrochemical reduction and oxidation of nitrogen through low-current electrolysis 68

Lubrication
Lubrication of porous solids in reference to human joints 144

Magnetic activity
Geomagnetic activity, sunspot number and its rate of increase 71

Magnetic field
The effect of suction on boundary layer for rotating flows with or without magnetic field 332

Magnetic parameter
Rotating hydromagnetic free shear layer flow for very large magnetic interaction parameter 218

Magnetic-elastic waves
Magneto-elastic transverse surface waves in an internal stratum 442

Mapping function
On the conformal mapping of a circular disc with a curvilinear polygonal hole 406

Mathematical model
Lubrication of porous solids in reference to human joints 144

Mechanical impedances
On the mechanical impedances for torsional wave propagation in a solid elastic cylinder 307

Methionine complexes
A polarographic study of methionine complexes of cadmium and indium 454

Methyl pyrimidine
The vibrational and electronic spectra of 5-methyl pyrimidine and 4-methyl pyrimidine 476

MHD flow
Combined effect of free and forced convection on magneto-hydrodynamic flow in a rotating channel 383

Microwave absorption
Study of microwave absorption and molecular structure of some substituted naphthalene sulphonic acids and their dipolar mixture 486

MnZn ferrites
Multiple sintering of MnZn ferrites in controlled atmosphere 131

Molecular structure
Study of microwave absorption and molecular structure of some substituted naphthalene sulphonic acids and their dipolar mixture 486

Multiple echoes
Equatorial range spread *F* and high multiple echoes from the *F* region 230

Nitrogen oxidation
Electrochemical reduction and oxidation of nitrogen through low-current electrolysis 68

Nonhomogeneity
Radial deformation of a nonhomogeneous spherically isotrophic elastic sphere with a concentric spherical inclusion 338

Non-homogeneous bar
The *H*-function and temperature in a non-homogeneous bar 99

Null congruences
On the geometry of null congruences in general relativity 546

Orthotropic, quasi-static
Thermally induced vibrations of orthotropic rectangular plate resting on elastic foundation 125

Oscillatory strength
Effect of viscosity on internal waves from a source in a wall 351

Periodicities
Periodicities in the series of cyclonic disturbances over India 429

Periodic points
On fixed and periodic points of quasi-contractive mappings 552

Piezoelectric crystal plate
Torsional waves in piezoelectric (622) crystal plate 289

Physiologically active compounds
Search for physiologically active compounds : Part XXVIII. Synthesis of 7-chloro-2-methyl and 2-(2-furyl), 3-aryl-4-quinazolones 81

Poisson-Jacobi transforms
Jacobi temperature 498

Polarography
Polarography of potassium ethylxanthate, a titrant in amperometry 514

Polygonal hole
On the conformal mapping of a circular disc with a curvilinear polygonal hole 406

Porous disks
Steady motion of a rotating stratified fluid bounded by porous disks 8

Porous solids
Lubrication of porous solids in reference to human joints 144

Pot cores
Multiple sintering of MnZn ferrites in controlled atmosphere 131

Potassium hexacyanoferrate
Interaction of potassium hexacyanoferrate (II) with histidine 199

Potentiometric determination
Potentiometric determination of thermodynamic parameters for the complex formation of Arsenazo I and Spadns with ytterium (III), zirconium (IV) and cerium (IV) 531

$\overline{\text{PPA}}$
Synthesis of benzodipyrandiones 524

Pressure gradient
On the flow of a dusty viscous liquid through a circular pipe 299

Quasi-contractive mappings
On fixed and periodic points of quasi-contractive mappings 552

Quasi-normal structure
Hypersurfaces of a nearly Sasakian manifold with quasi-normal (f, g, u, v, λ)-structure 537

Refraction diagrams
Stability of the coastline from Manakkodam to Thottappally along the Kerala coast 191

Relaxation time
On the flow of a dusty viscous liquid through a circular pipe 299

Rice's polynomials
An integral equation involving generalized Rice's polynomials 379

Rodrigue's formula
An integral equation involving generalized Rice's polynomials 379

Sasakian manifold
Hypersurfaces of a nearly Sasakian manifold with quasi-normal (f, g, u, v, λ)–structure 537

Scalar tensor theory
An exact solution of a scalar-tensor theory of gravitation 90

Serpentinite-granite
Albitisation at serpentinite-granite contact at Tagadur, Karnataka, India 58

Shear flow
Rotating hydromagnetic free shear layer flow for very large magnetic interaction parameter 218

Shock-induced vibrations
Thermally induced vibrations of orthotropic rectangular plate resting on elastic foundation 125

Soil moisture
Soil moisture movement and groundwater recharge by tritium tracer tagging technique 462

Sphene gneisses
Sphene bearing gneisses of Madhugiri area, Karnataka State, India 210

Spheroidal functions
A finite transform involving generalized prolate spheroidal wave functions and its applications 41
Generalized prolate spheroidal wave functions 104

Starlike functions
On the radius of α–convexity of certain classes of starlike functions 367

Stochastic discrete time systems
On discrete inequalities related to Gronwall's inequality 26

Stratification
Steady motion of a rotating stratified fluid bounded by porous disks 8

Stratified fluid
Steady motion of a rotating stratified fluid bounded by porous disks 8

Stresses
Radial deformation of a nonhomogeneous spherically isotropic elastic sphere with a concentric spherical inclusion 338

Suction, injection
Generalized couette flow with suction and injection 243

Sunspot
Geomagnetic activity, sunspot number and its rate of increase 71

Synergism
Synergism in the extraction of cadmium 75

Synthesis, 3-4-dichlorocomarins
Reaction of hexachloropropene with dihydroxy aryl aldehydes, ketones and acids 236

Tagging technique
Soil moisture movement and groundwater recharge by tritium tracer tagging technique 462

Test estimators
Pooling two censored samples from exponential populations 263

Thermal conductivity
The H-function and temperature in a non-homogeneous bar 99

Thermodynamic parameters
Formation constants of chelates of 7-nitro-8-hydroxyquinoline-5-sulphonic acid with yttrium and some lanthanides 303

Thiocyanate, aqueous medium
Substitution of coordinated chlorides in cis–α and cis–β dichloro (triethylene tetramine) cobalt (III) chloride $[Co(trien)Cl_2]Cl$ by thiocyanate in aqueous medium 319

Torsional waves
Torsional waves in piezoelectric (622) crystal plate 289

Torsional wave propagation
On the mechanical impedances for torsional wave propagation in a solid elastic cylinder 307

Variation thickness
Thermal deflection of an elastic circular plate of variable thickness 1

Velocity, shearing stress
Elastico-viscous flow engendered due to an impulsively started porous plane wall 272

Vertical plate
Effect of sudden suction on the hydromagnetic natural convection from a vertical plate 280

Viscosity
Effect of viscosity on internal waves from a source in a wall 351

Viscous laminar flow
Radial flow of a viscous, incompressible, electrically conducting fluid between two stationary, porous discs in the presence of transverse magnetic field 19

Volumetric determination
Volumetric determination of copper by precipitation with ammonium thiocyanate 55

Yttrium, lanthanides
Formation constants of chelates of 7-nitro-8-hydroxyquinoline-5-sulphonic acid with yttrium and some lanthanides 303

SUBJECT INDEX

Ablation
Observations on the spatial distribution of Dhajala meteorite fragments in the strewnfield 393

Acid catalysed cyclisation
Condensed cyclic and bridged-ring systems. VII. Acid-catalysed cyclisation of methyl substituted benzylcyclohexanols. Factors influencing the nature of cyclisation products 317

Active sites, alumina
Reactions of ketones on oxide surfaces. II. Nature of the active sites of alumina 283

Adsorption
A polarographic study of methionine complexes of nickel and cobalt 327

Alcohol
A polarographic study of methionine complexes of cadmium in mixed solvents 333

Aldol condensation
Reactions of ketones on oxide surfaces. II. Nature of the active sites of alumina 283

Alpha, Beta-unsaturated ketones
Homogeneous hydrogenations of α, β-unsaturated compounds using pentacyanocobaltate (II) anion as catalyst system 435

Alumina catalysis
Reactions of ketones on oxide surfaces. I. Reaction sequence of cyclohexanone on alumina 65

Ambidentate
Coordination properties of vic-isonitrosoimines in their copper (II) and palladium (II) complexes 471

Amine-exchange
Coordination properties of vic-isonitrosoimines in their copper (II) and palladium (II)complexes 471

Amplitude variation
On Love waves in a stratified hypoelastic solid with material boundary 383

Anamolous transport coefficients
Kinetic properties of Alfvén waves 151

Association constants
Molecular complexes of macrocyclic polyethers with 1, 3, 5-trinitrobenzene 465

Automatic phonetic transcription
Automatic phonetic transcription of Tamil in Roman script 503

Benzodioxane
Reaction of tetrahalogeno-*o*-benzoquinones part VI: Reactions of tetracholoro-*o*-benzoquinone with methyl naphthols—Formation of naphthoquinone methides 309

Bibenz (c, e) azepine
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines 25

Born equation
Equilibrium constants of UO_2^{2+}, Cu^{2+} with dicarboxylic acids in dioxane-water mixtures 497

Boundary value problems
Component-wise convergence in quasilinearization 519

Brillouin scattering
Non linear processes in laser light absorption 193

Cadmium-methionine complexes
A polarographic study of methionine complexes of cadmium in mixed solvents 333

Cascade, inverse magnetic
Implications of Navier-Stokes turbulence theory for plasma turbulence 87

Catalysed cyclisations
$AlCl_3$-HCl
Condensed cyclic and bridged-ring systems. VII. Acid-catalysed cyclisation of methyl substituted benzylcyclohexanols. Factors influencing the nature of cyclisation products 317
P_2O_5
Condensed cyclic and bridged-ring systems. VII. Acid-catalysed cyclisation of methyl substituted benzylcyclohexanols. Factors influencing the nature of cyclisation products 317

Cavitons
Three-dimensional nonlinear Schrödinger equation for plasma waves 141

Charge carriers
Electrical and magnetic properties of 3d-transition metal vanadates 455

Chrysin
Flavones of *Pajanelia multijuga* P. DC. and *Ligustrum neilgherense var. obovata* C.B.Cl. 41

Closed loop
Time minimizing transportation problems 513

CNDO/2
Molecular orbital studies on diazine mono and di N-oxides 273

Cobalt
A polarographic study of methionine complexes of nickel and cobalt 327
Anomalous double wave of cobalt (II) in aqueous thiocyanate medium 483
Polarography of cobalt (II) in water and 50% methanol 491

Collapse, of plasma waves
Three-dimensional nonlinear Schrödinger equation for plasma waves 141

Commuting extensions
On the commuting extensions of subnormal operators 365

Component-wise contraction
Component-wise convergence in quasilinearization 519

Conformation
Stereochemical studies on cyclic peptides-VIII. Conformational analysis of hydrogen bonded cyclohexaglycyl molecule with a centre of inversion symmetry 443

Conservation of laws
Kinetic properties of Alfvén waves 151
Theory of CO_2-laser induced x-ray emission from high density gaseous targets 209

Constants of motion
Implications of Navier-Stokes turbulence theory for plasma turbulence 87

Correlations, binary
Binary correlation and phase space granulation in a turbulent plasma 111

Couette flow
Temperature distribution in couette flow past a permeable bed 537

Cyclic
Stereochemical studies on cyclic peptides-VIII. Conformational analysis of hydrogen bonded cyclohexaglycyl molecule with a centre of of inversion symmetry 443

Cyclic allenes
Dihydroboration of cyclic allenes 15

Cyclic peptides
Stereochemical studies on cyclic peptides-VIII. Conformational analysis of hydrogen bonded cyclohexaglycyl molecule with a centre of inversion symmetry 443

Cyclohexaglycyl
Sterochemical studies on cyclic peptides-VIII. Conformational analysis of hydrogen bonded cyclohexaglycyl molecule with a centre of inversion symmetry 443

Data representation
Automatic phonetic transcription of Tamil in Roman script 503

Diazine N-oxides
Molecular orbital studies on diazine mono and di N-oxides 273

Dibenz (c, e) azocine
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines 25

Dienone
Reactions of tetrahalogeno-*o*-benzoquinones part VI: Reactions of tetrachloro-*o*-benzoquinone with methyl napthols—Formation of napthoquinone methides 309

Diffusion
Self similar solution of plasma equations 125
Nonlinear stability of a weekly ionised plasma 175

Diffusion
Equations
Self similar solution of plasma equations cross B 125
Kinetic properties of Alfvén waves 151

Anomalous
Kinetic properties of Alfvén waves 151

Dihydroboration
Dihydroboration of cyclic allenes 15

Dinuclear
Copper (II) complexes
Dinuclear copper (II) and nickel (II) systems with planar $M_2N_2O_2$ bridge 45

Nickel (II) complexes
Dinuclear copper (II) and nickel (II) systems with planar $M_2N_2O_2$ bridge 45

Diorganoboranes
Dihydroboration of cyclic allenes 15

Dioxan
A polarographic study of methionine complexes of cadmium in mixed solvents 333

Directed divergence
Generalized functional equation and its applications in information theory 353

Direct interaction approximation
Implications of Navier-Stokes turbulence theory for plasma turbulence 87

Disassociation constant
Equilibrium constants of UO_2^{2+}, Cu^{2+} with dicarboxylic acids in dioxane-water mixtures 497

Donor strengths
Molecular complexes of macrocyclic polyethers with 1, 3, 5-trinitrobenzene 465

Electric potential pulse
Transient analysis of a potential pulse in a piezoelectric (622) crystal plate 563

Electron density
Features of electron density and temperature in the 500-3500 km region of the plasmasphere —(1) Dawn and dusk sectors 423

Electron temperature
Features of electron density and temperature in the 500-3500 km region of the plasmasphere —(1) Dawn and dusk sectors 423

Elimination reaction
Dihydroboration of cyclic allenes 15

Equatorial spread *F*
Range and frequency spread *F* at Huancayo 417

Equatorial substorms
Coupling between equatorial and auroral ionospheres during polar substorms 409

Equilibrium constants
Equilibrium constants of UO_2^{2+}, Cu^{2+} with dicarboxylic acids in dioxane-water mixtures 497

Exchange interactions
Electrical and magnetic properties of 3d-transition metal vanadates 455

Expansion techniques
Multiple space time
Three-dimensional nonlinear Schrödinger equation for plasma waves 141
Vector eigen-function
Nonlinear stability of a weakly ionised plasma 175

Exponential pulse
Transient analysis of a potential pulse in a piezoelectric (622) crystal plate 563

Extraction
Mixed complexes of iron (III)—thiocyanate with some nitrogen and oxygen donors and their analytical applications 479

Feasible solution
Time minimizing transportation problems 513

Fixed point method
Stability condition for functional equation through fixed point in the large 603

Flavones
Flavones of *Pajanelia multijuga* P. DC. *Ligustrum neilgherense var. obovata* C.B.Cl. 41

Flexure problem
Flexure of a micropolar elastic circular cylinder 575

Force fields
Kinetic constants method for the vibrational analysis of carbon suboxide and carbonsubsulphide molecules 299

Fossil tracks
Observations on the spatial distribution of Dhajala meteorite fragments in the strewnfield 393

Fragmentation dynamics
Observations on the spatial distribution of Dhajala meteorite fragments in the strewnfield 393

Free convection effects
Free convection effects on the oscillatory flow of an incompressible viscous fluid past an infinite, vertical plate with variable suction 371

Free energy
Free energy relationship in some electron-transfer reactions 53

Functional equation
Generalized functional equation and its applications in information theory 353

Hankel transform
Unsteady flow of a dusty gas in cylinders with circular and sectorial cross sections 591

Heating
Electrons
Kinetic properties of Alfvén-waves 151
Nonlinear
Implications of Navier-Stokes turbulance theory for plasma turbulance 87
Resonant
Kinetic properties of Alfvén-waves 151
Plasma
Implications of Navier-Stokes turbulence theory for plasma turbulence 87
Observations of plasma wave states 223
Plasma physics experiments at Physical Research Laboratory 231
Laser
Plasma physics experiment at Physical Research Laboratory 231

Heat transfer
Heat transfer for flow past permeable bed 557

Heterocyclics
In-plane normal vibrations of 1, 2, 5-oxa-, thia- and selena-diazoles, 1, 3, 4-oxa- and thiadiazoles and 1, 2, 3, 4-thiatriazoles 265

Heterogeneous catalysis
Reactions of kerones on oxide surfaces. I. Reaction sequence of cyclohexanone on alumina 65

Hexapeptides
Stereochemical studies on cyclic peptides-VIII. Conformational analysis of hydrogen bonded cyclohexaglycyl molecule with a centre of inversion symmetry 443

Homogeneous hydrogenation
Homogeneous hydrogenations of α, β-unsaturated compounds using pentacyanocobaltate (II) anion as catalyst system 435

Hopping conduction
Electrical and magnetic properties of 3d-transition metal vanadates 455
HMR chemical shifts
Molecular complexes of macrocyclic polyethers with 1, 3, 5-trinitrobenzene 465
Hydromagnetic flow
Hydromagnetic flow near an oscillating porous flat plate 531
Hypoelasticity
On Love waves in a stratified hypoelastic solid with material boundary 383
Iesan semi-inverse method
Flexure of a micropolar elastic circular cylinder 575
Incompressible fluid
Free convection effects on the oscillatory flow of an incompressible viscous fluid past an infinite, vertical plate with variable suction 371
Hydromagnetic flow near an oscillating porous flat plate 531
Independent stream model
Theory of CO_2-laser induced x-ray emission from high density gaseous tragets 209
Information theory
Generalized functional equation and its applications in information theory 353
Instability
Absolute
Nonlinear processes in laser light absorption 193
Cross field
Plasma physics experiments at Physical Research Laboratory 231
Decay
Kinetic properties of Alfvén waves 151
Drift wave
Kinetic properties of Alfvén waves 151
Farley-Buneman
Plasma physics experiments at Physical Research Laboratory 231
Kelvin-Helmholtz
Kinetic properties of Alfvén waves 151
Modulational
Three-dimensional nonlinear Schrödinger equation for plasma waves 141
Oscillating two-stream
Nonlinear processes in laser light absorption 193
Parametric
Nonlinear processes in laser light absorption 193
Integrals of motion
Three-dimensional nonlinear Schrödinger equation for plasma waves 141
Ionospheric electric fields
Coupling between equatorial and auroral ionospheres during polar substorms 409
Iron (III)
Mixed complexes of iron (III)—thiocyanate with some nitrogen and oxygen donors and their analytical applications 479
Iterative extended Huckel
Molecular orbital studies on diazine mono and di N-oxides 732
Isolin, benzofurandione hydrazones
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) amilines 25
Isotropic shifts
Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-methylpyridine-1-oxide 59
Kaempferitrin
Flavones of *Pajanelia multijuga* P. DC. and *Ligustrum neilgherense var. obovata* C.B.Cl. 41
Kinetic Alfvén wave
Kinetic properties of Alfvén waves 151
Kinetic parameters
A polarographic study of methionine complexes of cadmium in mixed solvents 333
Ketone reaction mechanism
Reactions of ketones on oxide surfaces. II. Nature of the active sites of alumina 283
Korte-de Vries equation
Self similar solution of plasma equations 125
Landau damping
Kinetic properties of Alfvén waves 151
Binary correlation and phase space granulation in a turbulent plasma 111
Self similar solution of plasma equations 125
Lanthanide complexes
Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-metylphyridine-1-oxide 59
Lanthanide NMR shifts
Flavones of *Pajanelia multijuga* P. DC. and *Ligustrum neilgherense var. obovata* C.B.Cl. 41
Laplace transform
Unsteady flow of a dusty gas in cylinders with circular and sectorial cross sections 591
Laser induced emission
Binary correlation and phase space granulation in a turbulent plasma 111
Ligustrum neilgherense var. obovata
Flavones of *Pajanelia multijuga* P. DC. and *Ligustrum neilgherense var. obovata* C.B.Cl. 41

Linderberg's relation
Semiempirical investigation of Linderberg's relation in heteroaromatic systems 81

Linearization of Tamil script
Automatic phonetic transcription of Tamil in Roman script 503

Love waves
On love waves in a stratified hypoelastic solid with material boundary 383

Macrocyclic polyethers
Molecular complexes of macrocyclic polyethers with 1, 3, 5-trinitrobenzene 465

Macrodisplacement vector
Flexure of a micropolar elastic circular cylinder 575

Magnetic helicity
Implications of Navier–Stokes turbulence theory for plasma turbulence 87

Magnetic properties
Dinuclear copper (II) and nickel (II) systems with planar $M_2N_2O_2$ bridge 45

Magnitude-vector valued functions
Component-wise convergence in quasilinearization 519

Material boundary
On Love waves in a stratified hypoelastic solid with material boundary 383

Meteorite
Observations on the spatial distribution of Dhajala meteorite fragments in the strewnfield 393

Methanol
Polarography of cobalt (II) in water and 50% methanol 491

Methionine
A polarographic study of methionine complexes of nickel and cobalt 327

Methyl naphthol reaction
Reactions of tetrahalogeno-*o*-benzoquinones part VI: Reactions of tetrachloro-*o*-benzoquinone with methyl naphthols—Formation of naphthoquinone methides 309

2-methylpyridine-1-oxide
Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-methylpyridine-1-oxide 59

4-methylpyridine-1-oxide
Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-methylpyridine-1-oxide 59

MHD flow
Flow engendered by the time-varying motion of a porous plate in the presence of a magnetic field 549

Micropolar elasticity
Flexure of a micropolar elastic circular cylinder 575

Microrotation vector
Flexure of a micropolar elastic circular cylinder 575

MINDO/2
Molecular orbital studies on diazine mono and di N-oxides 273

Mobility coefficient
Nonlinear stability of a weakly ionised plasma 175

Modes
Negative energy
Effect of coherent and turbulent spectrum of waves on trapped particle modes 187
Theory of CO_2-laser induced x-ray emission from high density gaseous targets 209
Positive energy
Theory of CO_2-laser induced x-ray emission from high density gaseous target 209

Modes, trapped
Effect of coherent and turbulent spectrum of waves on trapped particle modes 187

Molecular complexes
Molecular complexes of macrocyclic polyethers with 1, 3, 5-trinitrobenzene 465

Molecular constants
Kinetic constants method for the vibrational analysis of carbon suboxide and carbon subsulphide molecules 299

Molecular dynamics
Kinetic constants method for the vibrational analysis of carbon suboxide and carbon subsulphide molecules 299

Neutral bases
Mixed complexes of iron (III)-thiocyanate with some nitrogen and oxygen donors and their analytical applications 479

Nickel
A polarographic study of methionine complexes of nickel and cobalt 327

NMR mass spectra
Reactions of tetrahalogeno-*o*-benzoquinones part VI: Reactions of tetrachloro-*o*-benzoquinone with methyl naphthols—Formation of naphthoquinone methides 309

N-(*o*-aminobenzoyl)-benzyl amine
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines 25

N-(*o*-aminophenylacetyl) anilines
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzoyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines 25

Nonlinear
Damping
Nonlinear stability of a weakly ionised plasma 175
Schrödinger equation
Three dimensional nonlinear Schrödinger equation for plasma waves 141
Stability
Nonlinear stability of a weakly ionised plasma 175
Waves
Three-dimensional nonlinear Schrödinger equation for plasma waves 141
Kinetic properties of Alfvén waves 151
Operational calculus
Unsteady flow of a dusty gas in cylinders with circular and sectorial cross sections 591
Optimal solution
Time minimizing transporation problems 513
Oroxylin A
Flavones of *Pajanelia multijuga* P. DC. and *Ligustrum neilgherense var. obovata* C.B.Cl. 41
Oscillatory flow
Free convection effects on the oscillatory flow of an incompressible viscous fluid past an infinite, vertical plate with variable suction 371
Oxadiazoles
In-plane normal vibrations of 1, 2, 5-oxa-, thia- and selena-diazoles, 1, 3, 4-oxa-and thia-diazoles and 1, 2, 3, 4-thiatriazoles 265
Oxide surfaces
Reactions of ketones of oxide surfaces. II. Nature of the active sites of alumina 283
Pajanelia multijuga
Flavones of *Pajanelia multijuga* P. DC. and *Ligustrum neilgherense var. obovata* C.B.Cl. 41
Pariser-Parr-Pople
Molecular orbital studies on diazine mono and di N-oxides 273
Pentacyanocobaltate (II)
Homogeneous hydrogenations of α, β-unsaturated compounds using pentacyanocobaltate (II) anion as catalyst system 435
Permeable bed
Temperature distribution in Couette flow past a permeable bed 537
Phenethyl amines
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines 25
Photochemical transformations
Thermal and photochemical transformations of tetraphenyl-*p*-dioxin and tetraphenyl-*p*-dithiin 1
Picoline-N-oxide
Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-methylpyridine-1-oxide 59
Plasmasphere
Features of electron density and temperature in the 500-3500 km region of the plasmasphere—(1) Dawn and dusk sectors 423
Polarography
A polarographic study of methionine complexes of nickel and cobalt 327
A polarographic study of methionine complexes of cadmium in mixed solvents 333
Anomalous double wave of cobalt (II) in aqueous thiocynate medium 483
Polarography of cobalt (II) in water and 50% methanol 491
Polyphosphoric acid
Condensed cyclic and bridged-ring systems. VII. Acid-catalysed cyclisation of methyl substituted benzylcyclohexanols. Factors influencing the nature of cyclisation products 317
Ponderomotive force
Three-dimensional nonlinear Schrödinger equation for plasma waves 141
Nonlinear processes in laser light absorption 193
Porous media
Heat transfer for flow past permeable bed 557
Porous plate
Free convection effects on the oscillatory flow of an incompressible viscous fluid past an infinite, vertical plate with variable suction 371
Hydromagnetic flow near an oscillating porous flat plate 531
Pressure gradient
Unsteady flow of a dusty gas in cylinders with circular and sectorial cross sections 591
Pschorr reaction
Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines 25
Quasilinearization
Component-wise convergence in quasilinearization 519
Quasi-normal operator
On the commuting extensions of subnormal operators 365
Quinone methides
Reactions of tetrahalogeno-*o*-benzoquinones part VI: Reactions of tetrachloro-*o*-benzoquinone with methyl naphthols—Formation of naphthoquinone methides 309

Quinone oxidation
Reactions of tetrahalogeno-*o*-benzoquinones part VI: Reactions of tetrachloro-*o*-benzoquinone with methyl naphthols—Formation of naphthoquinone methides 309

Range frequency spreading
Range and frequency spread *F* at Huancayo 417

Renormalized quasilinear approximation
Binary correlation and phase space granulation in a turbulent plasma 111

Resonance broadening
Three-dimensional nonlinear Schrödinger equation for plasma waves 141

Absorption
Binary correlation and phase space granulation in a turbulent plasma 111

Mode conversion
Kinetic properties of Alfvén waves 151

Secularity
Three-dimensional nonlinear Schrödinger equation for plasma waves 141

Restricted rotation
Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-methylpyridine-1-oxide 59

Riemann zeta-function
On the frequency of Titchmarsh's phenomenon for $\zeta(s)$—III 341

Roman script
Automatic phonetic transcription of Tamil in Roman script 503

Scattering, Brillouin
Nonlinear processes in laser light absorption 193

Compton
Kinetic properties of Alfvén waves 151

Schrödinger equation
Three-dimensional nonlinear Schrödinger equation for plasma waves 141

Theory of CO_2-laser induced x-ray emission from high density gaseous targets 209

A critical survey of ion-acoustic waves 217

Selena diazoles
In-plane normal vibrations of 1, 2, 5-oxa-, thia- and selena-diazoles, 1, 3, 4-oxa- and thia-diazoles and 1, 2, 3, 4-thiatriazoles 265

Self energy correction
Theory of CO_2-laser induced x-ray emission from high density gaseous targets 209

Self similar solutions
Self similar solution of plasma equations 125

Self similar variables
Self similar solution of plasma equations 125

Semiempirical calculation
Semiempirical investigation of Linderberg's relation in heteroaromatic systems 81

Skin-friction
Flow engendered by the time-varying motion of a porous plate in the presence of a magnetic field 549

Solitons
Three-dimensional nonlinear Schrödinger equation for plasma waves 141
Plasma physics experiments at Physical Research Laboratory 231

Spectrophotometry
Mixed complexes of iron (III)-thiocyanate with some nitrogen and oxygen donors and their analytical applications 479

Stability, asymptotic stability
Stability conditions for functional equations through fixed point in the large 603

Stability constants

Chemical Sciences

INORGANIC AND ANALYTICAL

Dinuclear copper (II) and nickel (II) systems with planar $M_2N_2O_2$ bridge
S Baral and A Chakravorty 45–52

Free energy relationship in some electron-transfer reactions
T P Radhakrishnan and A K Sundaram 53–57

Complexes of lanthanide iodides with 4-methylpyridine-1-oxide and 2-methylpyridine-1-oxide
L Ramakrishnan and S Soundararajan 59–64

Coordination properties of vic-isonitrosoimines in their copper (II) and palladium (II) complexes
B P Sudha, N S Dixit and C C Patel 471–478

Mixed complexes of iron (III)-thiocyanate with some nitrogen and oxygen donors and their analytical applications
V Pandu Ranga Rao, D Sree Ramachandra Murthy and A S R Krishna Murty 479–482

Anomalous double wave of cobalt (II) in aqueous thiocyanate medium
K Varughese and T P Radhakrishnan 483–490

Polarography of cobalt (II) in water and 50% methanol
K Varughese and T P Radhakrishnan 491–496

Equilibrium constants of UO_2^{2+}, Cu^{2+} with dicarboxylic acids in dioxane-water mixtures
D N Shelke and D V Jahagirdar 497–501

ORGANIC

Thermal and photochemical transformations of tetraphenyl-*p*-dioxin and tetraphenyl-*p*-dithin
S Lahiri, V Dabral, V Bhat, E D Jemmis and M V George 1–14

Dihydroboration of cyclic allenes
I Mehrotra, M M Bhagawat and D Devaprabhakara 15–23

Application of Pschorr reaction to N-(*o*-aminobenzoyl)-benzyl and phenethyl amines and to N-(*o*-aminophenylacetyl) anilines
K Nagarajan, P Madhavan Pillai, A Nagana Goud and R K Shah 25–39

Flavones of *Pajanelia multijuga* P. DC. and *Lingustrum neilgherense var. Obovata* C.B.Cl.
B S Joshi and D H Gawad 41–44

Reactions of tetrahalogeno-*o*-benzoquinones Part VI: Reactions of tetrachloro-*o*-benzoquinone with methyl naphthols—formation of napthoquinone methides
T R Kasturi and R Sivaramakrishnan 309–316

Condensed cyclic and bridged-ring systems. VII: Acid-catalysed cyclisation of methyl substituted benzylcyclohexanols. Factors influencing the nature of cyclisation products
Jyotirmoy Chakravarty, Rupak Dasgupta, Jayanta K Ray and Usha R Ghatak 317–325

Homogenous hydrogenations of a α, β-unsaturated compounds using pentacyanocobaltate (II) anion as catalyst system
G S R Subha Rao, J Rajaram, S Rathnamala and R Sivaramakrishnan 435–442

Sterochemical studies on cyclic peptides—VIII. Conformational analysis of hydrogen bonded cyclohexaglycyl molecule with a centre of inversion symmetry
G Manjula, C Ramakrishnan and K P Sarathy 443–454

Physical and Theoretical

Reactions of ketones on oxide surfaces. I. Reaction sequence of cyclohexanone on alumina
P Ganguly 65–79

Semiempirical investigation of Linderberg's relation in heteroaromatic systems
Kamalini Sane and K V Sane 81–85

In-plane normal vibrations of 1, 2, 5-oxa-, thia- and selena-diazoles, 1, 3, 4-oxa- and thia- diazoles and 1, 2, 3, 4-thiatriazoles
Shanti A Kudchadker and C N R Rao 265–227

Molecular orbital studies on diazine mono and di N-oxides
G V Kulkarni, Arbinda Ray and C C Patel 273–281

Reactions of ketones on oxide surfaces II. Nature of the active sites of alumina
P Ganguly 283–297

Kinetic constants method for the vibrational analysis of carbon suboxide and carbon subsulphide molecules
S Mohan 299–308

Electrical and magnetic properties of 3d-transition metal vanadates
O G Palanna, A L Shashi Mohan and A B Biswas 455–463

Molecular complexes of macrocyclic polyethers with 1, 3, 5-trinitrobenzene
Y Jayathirtha and V Krishnan 465–470

Geosciences

Observations on the spatial distribution of Dhajala meteorite fragments in the strewn-field
D Lal and J R Trivedi 393–407

Coupling between equatorial and auroral ionospheres during polar substorms
R G Rastogi 409–416

Range and frequency spread *F* at Huancayo
R G Rastogi and G D Vyas 417–421

Features of electron density and temperature in the 500–3500 km region of the plasmasphere—(1) and dawn dusk sectors
Girija Rajaram and A C Das 423-434

Mathematical Sciences

On the frequency of Titchmarsh's phenomenon for $\xi(s)$—III
R Balasubramanian and K Ramachandra 341–351

Generalized functional equation and its applications in information theory
G C Patni and K C Jain 353–364

On the commuting extensions of subnormal operators
Rathindra Nath Mukherjee and Ramendra Krishna Bose 365–370

Free convection effects on the oscillatory flow of an incompressible viscous fluid past an infinite, vertical plate with variable suction
V M Soundalgekar 371–382

On love waves in a stratified hypoelastic solid with material boundary
D S Chandrasekharaiah 383–391

Automatic phonetic transcription of Tamil in Roman script
E V Krishnamurthy 503–512

Time minimizing transportation problems
J K Sharma and Kanti Swarup 513–518

Component-wise convergence in quasilinearization
R P Agarwal 519–529

Hydromagnetic flow near an oscillating porous flat plate
R C Choudhary 531–535

Temperature distribution in Couette flow past permeable bed
N Rudraiah and R Veerabhadraiah 537–547

Flow engendered by the time-varying motion of a porous plate in the presence of a magnetic field
Shankar Prasad Mishra and Dola Govinda Sahoo 549–556

Heat transfer for flow past permeable bed
V Vidyanidhi, A Sithapati and P C L Narayana 557–561

Transient analysis of a potential pulse in a piezoelectric (622) crystal plate
H S Paul and K Venkateswara Sarma 563–573

Flexure of a micropolar elastic circular cylinder
G V Krishna Reddy and N K Venkatasubramanian 575–590

Unsteady flow of a dusty gas in cylinders with circular and sectorial cross sections
R K Gupta and S C Gupta 591–601

Stability condition for functional equation through fixed point in the large
N P S Bawa and R C Varma 603–607

Plasma Sciences

Implications of Navier-Stokes turbulence theory for plasma turbulence
David Montgomery 87–110

Binary correlation and phase space granulation in a turbulent plasma
